CITY VIEW

3, 4 & 5 bedroom homes

TILIA
HOMES

PART OF THE **untypical** GROUP

Welcome to City View

... the kettle's on.

Situated just over the river from the city of Exeter, with views across the city to the east and over sweeping countryside to the west, this beautiful collection of 3, 4 & 5 bedroom homes is perfectly positioned offering the best in urban and rural living.

Local amenities are just minutes away from the development, whilst residents will also have quick access to the scenic beauty of Dartmoor's open countryside.

City View is the perfect place to call home with a collection of quality homes designed with modern efficiency in mind.

The benefits of buying new

All our homes come with a 2 year Tilia Homes Customer Care Warranty and a further 8 year NHBC Warranty for added peace of mind.

Energy Efficient

New homes are built to the latest specifications and standards meaning a more energy efficient home.

Great Schemes

Benefit from schemes only available when buying a new build, such as our Part Exchange and Smooth Move schemes.

Low Maintenance

With the latest regulations and specifications it's unlikely you'll need to worry about repairs for a while. New homes also include a 10 year NHBC warranty to cover structural defects.

No Chain

You are not buying into a chain. This means a faster, easier buying process without the hassle.

Personalise your home

You can make changes to your home by choosing from our extensive list of optional extras subject to build stage.

It's Brand New

Be the first to live in the property. It's brand new – and all yours!

A guide to Air Source Heat Pumps

Air Source Heat Pumps (ASHPs) work best in well insulated properties, providing low running costs, zero emissions and low maintenance. They work in a similar manner to a fridge but in reverse, producing heat from cold air. It can even get heat from the air when the temperature is as low as -15°C.

The main unit is located outside your home. It absorbs heat from the air, drawn in by a fan and transfers it to a liquid refrigerant, which is then compressed to increase its temperature. This heat is transferred via a heat exchanger to your radiators and hot water circuits.

There are two key points you need to be aware of:

- Firstly, ASHPs work more efficiently at lower temperatures. As such, it is likely to take longer to raise the temperature in your home to a comfortable level compared to a gas boiler. An ASHP should be set to heat your home over a couple of hours, compared to a boiler in just 30 minutes. Don't be surprised if your radiators are not hot to touch, this is normal.
- Secondly, the system is controlled by a room thermostat, like a gas boiler, but it operates in a slightly different way. Your rooms are fitted with an ASHP controller and thermostat, which will turn your heat

All homes at City View will benefit from having an Air Source Heat Pump. The below information will help you understand how these work to heat your home and hot water.

pump on and off, set timers and control your heating and hot water.

The room thermostat monitors temperatures to ensure they do not go too low or too high and communicates with the heat pump to come on if the home drops below the required air temperature. Much like a gas boiler, your ASHP will require an annual service, as it is important to keep the liquid refrigerant topped up to protect it from freezing. By understanding and following these guidelines, you can ensure the efficient and effective operation of your ASHP system.
